unique feature

motor can be installed vertically

eco Life
JUMBO®
對開電動窗簾

▌Features

1. All voltages: AC 100-240V input, Compatible with all voltages around the world.
2. Multi-devices linkage:RJ12 standard port, support multi motors controllability, manual switches available for each motor.

3. Emergency break system:when unexpected stop happens during movement, the movement will stop automatically.
4. Manual initiation function: when plugged in, gently pull the curtain for 15cm, the curtain will automatically open or close.（Fig.1）
5. Manual:when power outage, the curtain can be open or close manually, just like manual curtain.
6. Free location setting: Instead of being fully closed or open, one more stop point can be set. Brings better control ability.

Fig.1

gently pull the curtain for 15cm
the curtain will automatically open or close.

7. Silence design: high precision DC motor, leading intelligent design, features buffer system for movement initiation and stop, light and quieter.
8. Multi-controllability, widely used: Depends on purposes, available for wireless remote control, wire switches, R232/485 communication etc.
9. Memory system: doesn't require manual setting for open and close, auto detect stop points, doesn't require reset when the system restart. Protect the parts from collisions and noise.

▌Mechanism and Parts:

toothed belt drive
toothed belt
track
secondary toothed belt drive
fabric end hanger
lock
hanger
sled part
lock
fabric end hanger
center open motor
